PROJECTS

To-Do Management Application

December 2024

- Developed a to-do management application using **HTML, CSS** for the frontend and **Django** for the backend.
- Enabled users to add, edit, and delete tasks efficiently.
- Designed a clean and user-friendly interface for task management.
- Highlighted CRUD operations and showcased robust backend functionality with Django.

Music Player Application

October 2024

- Built an interactive music player with **HTML, CSS** for the frontend and **Django** for the backend.
- Included features like play, pause, forward, and backward for music playback.
- Designed a responsive, user-friendly interface for smooth interaction.

Exam and Lab Management

March - July 2024

- Designed and developed a web-based application using **HTML, CSS, and PHP**.
- Modules are **IT Department, Faculty, and Student**.
- Implemented features for the IT Department to manage student data and notify faculty about resolved hardware/software issues.
- Enabled faculty to report lab issues and monitor students eligible for reappearing in exams.
- Provided students with an intuitive interface to register for reappearing exams by semester.

Hospital Management System

Oct - Jan 2024

- Developed a web-based system using **HTML, CSS, and PHP**.
- Modules are **Admin, Doctor, Patient, and Receptionist**.
- Implemented functionalities like appointment booking, patient history management, prescription generation, and staff administration.
- Integrated role-based access control for secure data handling.
- Designed intuitive user interfaces and efficient backend logic for smooth operations.
